

Assignment-3

Guided by:- PROF. SAURABH GUPTA

TOPIC- Moravec's Paradox

SUMMARY

Moravec's paradox proposes that this distinction has its roots in evolution. As a species, we have spent millions of years in selection, mutation, and retention of specific skills that has allowed us to survive and succeed in this world. Some examples of such skills include learning a language, sensory-motor skills like riding a bicycle, and drawing basic art.
